

## Better Intimacy | Founder Pitch (Faith-Aware Variant)

### The Mission

We help couples build daily connection with tools that are private, practical, and respectful of faith. Faith-aware guidance is optional and guardrail-first.

### The Problem

Many faith-forward couples avoid relationship tech because it feels generic, preachy, or unsafe. They want support without pressure.

### The Solution

Better Intimacy offers a shared relationship workspace plus Aurora AI. When users opt in, Aurora references faith context gentlyâ never as authorityâ and always keeps the user in control.

### Why Now

Couples are seeking structured, private support between counseling sessions and community groups. The demand for trust-first tools is rising.

### Partnership Ask

We are looking for values-aligned partners to co-host challenges, share story-driven content, and provide feedback on guardrail integrity.

### Guardrails

No proselytizing. No moral shaming. No authority claims. No medical or legal advice. Opt-in only with clear consent.
